

ARTSPEC[®] Foam

ARTSPEC Foam is ideal for lining compartments and enclosures that contain sources of excessive noise. The Hypalon-coated, convoluted surface allows noise to pass through, but is resistant to water, oils, and solvents. This product is also available with a tough Tedlar facing, or aluminized Mylar for special applications.

Typical Applications

To absorb noise within and around:

- Boilers
- Pumps
- Compressors
- HVAC equipment
- Generators
- Routers
- Industrial dust collectors
- Saws

Frequencies in Herz	Sound Absorption Coefficients*
125	0.00
250	0.26
500	1.01
1000	0.82
2000	0.68
4000	0.60
* NRC	0.70

Product Specifications

Material:	1" open cell willtec TM
Surface Pattern:	Shallow sculpted
Density:	0.7 pounds per cubic foot
Tensile Strength:	8 PSI
Flammability:	ASTM E 84 Class 1
Flame Spread:	Hypalon Coated Foam - 25
Smoke Density:	Hypalon Coated Foam - 185
